

# River Health & Wellness

Tanecia Webster, A.N.P.

Dear Patient,

Welcome to River Health & Wellness! Our clinic aims to serve our community by providing compassionate medical care. We value a comprehensive approach in treating acute medical needs, chronic health conditions, and providing occupational and preventive services.

We ask that you come to your initial appointment prepared with a valid ID or driver's license, current insurance card(s), and your current medications (or a list of) to make your appointment and billing as smooth as possible. Your first appointment will take approximately an hour depending on complexity of medical history.

If your initial appointment is an annual examination, please come to your appointment fasting as to not delay yearly preventative lab work.

As a new patient you may want to register for our Athena patient portal for convenience. There is a link on the home page to register. Through the patient portal you can view and request medical records, schedule appointments once established, and request refills of medications. Of course, this is not mandatory, you are always still welcome to call the front office and speak with a live person.

May we extend our sincere thanks for the opportunity to meet your healthcare needs. We look forward to a continued relationship with you and your family as we work together towards our mutual goal of a healthier you.

Welcome to our practice.
